

CDIT Import Controller for Kofax Capture

Automatically and securely transfer inbound faxes and other scanned images to Kofax Capture for processing

The CDIT Import Controller for Kofax Capture is a custom module developed for Kofax Capture, which facilitates the automated import of electronic files—including faxes received via a fax server and documents scanned via multi-function devices (MFD)—into pre-defined batch class workflows for processing within Kofax Capture.

The CDIT Import Controller for Kofax Capture provides your organization with a solution that both eliminates the issue of lost faxes and documents scanned via MFDs, while allowing you to process these documents using the same Kofax business rules as traditionally scanned documents.

The CDIT Import Controller runs as an unattended Windows service and can be configured to process any number of Import Jobs to support multiple Kofax Capture batch class definitions.

Key Features and Capabilities

The CDIT Import Controller for Kofax Capture includes a number of key features and capabilities, including:

- configurable import parameters, including import directories, batch classes, import polling frequency, and batch-level field mappings;
- ability to monitor multiple import folders, as well as all sub-folders for one configured Import Job;
- automatic conversion of image resolution for incoming faxes.

Kofax Capture Support

The CDIT Import Controller has been certified for use with Kofax Capture v7.x - v9.

About CDIT

CDIT Inc. is Canada's leading Enterprise Capture Consultant/Integrator. We are focused on accelerating the CAPTURE, TRANSFORMATION, DELIVERY and EXCHANGE of critical information that is an essential part of every organization.

We work with leading organizations to define, architect, supply and implement innovative ECM Solutions to help reduce operational costs as well as enhance competitive positioning. These solutions update the capture, transformation, delivery and exchange of critical information that drives our clients' business processes. Our unmatched combination of solutions and technologies improve the speed, cost, accuracy and efficiency of business transactions by enabling organizations to receive and exchange information automatically with anyone, anywhere, in any format. These solutions work directly with the business applications and IT platforms that workers already know and use.
