

# CDIT Print & Fax Extension for Kofax Capture

## Print or fax pages and entire documents directly from within standard Kofax Capture modules

CDIT Print & Fax Extension for Kofax Capture allows Kofax Capture users to print or fax entire documents or selected pages directly from within the Scan, Validation, Verification and Quality Control modules in Kofax Capture.

Printing or faxing at the document level prints/faxes all pages in the document, while printing or faxing at the page level prints/faxes only the selected pages. Print and fax jobs are submitted to the default printer or fax server accessible to the Kofax workstation from which the printing or faxing is being performed.

CDIT Print & Extension is extremely easy to install and uses the familiar right-click Windows pop-up menu—requiring virtually no end-user training.

### Key Features and Capabilities

CDIT Print & Fax Extension for Kofax Capture includes a number of key features and capabilities, including:

- Scan, Validation, Verification and Quality Control module support;
- Document and page-level printing;
- Right-click Windows pop-up menu functionality;
- Windows-supported Active X Control;
- Easy to install and configure;
- Minimal end-user training.
