

# SAVE YOUR ENERGY

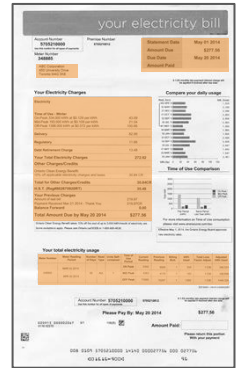

WITH INTELLIGENT DATA CAPTURE  
FOR ENERGY MANAGEMENT

## INTELLIGENT CAPTURE

Collect Consumption Data from Utility Bills

line items  
meter numbers  
rate classes  
loss factors  
& much more...

## ANY ERP/EMS

“Energy bill processing for our EMS was a manual one, and therefore very time consuming and labor intensive. The **savings** to date are a combination of early identification of billing errors, cost avoidance (late charges/fees related to bills being paid delayed), and the resulting savings achieved through more **efficient** energy procurement strategies from actual consumption analysis.”

Supervisor, Energy Services  
Real Property Asset Management  
Regional Municipal Government

## COMPELLING BENEFITS

+50% reduction  
in front-end  
processing
